PROFILE

Early-career AI and software professional with hands-on experience in artificial intelligence, software development, machine learning, computer vision, and AI-powered product development. Completed an Artificial Intelligence Diploma at Damascus Training Center (DTC) - UNRWA in 2026, with practical internship experience in AI product development and web development. Strong foundation in Python, AI applications, Flutter, and problem solving, with clear motivation to contribute to real-world digital solutions and grow into a full-time technology career.

PROFESSIONAL EXPERIENCE

AI Product Development Associate Intern | Devista

Damascus, Syria | Jun 2026 - Jul 2026

- Selected from 130+ applicants for a competitive practical technology internship focused on software engineering, AI development, and product thinking.
- Contributed to AI-powered product development by supporting user-focused digital solutions and practical business use cases.
- Collaborated with a multidisciplinary team to convert product ideas into working technology concepts.

Web Development & Backend Intern | Vica Web Solutions

Damascus, Syria | Jun 2026 - Jul 2026

- Support web application development and backend functionality, including feature implementation, testing, debugging, and quality improvements.
- Work with developers to improve application usability, performance, and reliability.

FEATURED PROJECTS

Autonomous Vehicle System | Graduation Project
Built an autonomous vehicle prototype using Raspberry Pi 5 and Arduino, with computer vision capabilities to detect traffic lights, traffic signs, pedestrians, and vehicles for real-time decision support.

Pathly - AI-Powered Learning Path Builder
Developed a full-stack AI application that generates personalized learning roadmaps based on individual goals, skill needs, and development priorities.

Traffic Sign Detection Model
Trained a CNN model on the GTSRB dataset to classify traffic signs, strengthening practical machine learning and computer vision experience.

Age Detection System
Created a Python and OpenCV application to estimate age from images or live camera input.

AI Recruitment Chatbot
Built an NLP chatbot using Python and Rasa to collect applicant information and simulate early-stage recruitment screening.

Mobile Grocery Store App
Developed a Flutter mobile application concept for grocery ordering with responsive UI design and future scalability potential.

CORE SKILLS

AI & ML
Machine Learning, Computer Vision, Deep Learning, CNNs, NLP

Programming
Python, C#, Dart

Frameworks
Flutter, OpenCV, Rasa, Unity

Data & Platforms
MySQL, Linux, Raspberry Pi OS, Arduino

Product Skills
Product development, business analysis, user-centered design

Office Tools
Excel, PowerPoint, Word

EDUCATION

Diploma in Artificial Intelligence
Damascus Training Center (DTC) - UNRWA
Damascus, Syria | Completed 2026

Focused on artificial intelligence, software development, computer vision, and emerging technologies.

PROFESSIONAL DEVELOPMENT

AI Short Course | SPA
Aug 2024 - Sep 2024

Covered AI fundamentals, practical AI tools, and AI workflow applications.

LANGUAGES

Arabic - Native

English - B2 Professional Working Proficiency

CAREER FOCUS

- AI & software roles
- Junior AI product development
- Machine learning projects
- Computer vision projects
- Full-time early-career technology roles

PROFILE STRENGTHS

- Practical builder mindset
- Competitive internship selection
- Strong project portfolio
- User-focused problem solving
- Continuous learning attitude
